

CRITICAL LANDSCAPES

GARETH DOHERTY

MAY 17th, 2023 | 10.00 AM -12.00 PM | VIA SARAGOZZA 8 | BOLOGNA | MEETING ROOM "EX_PAM"

Introduction: Prof. Roberto Pasini, DBC UniBo

This lecture will explore landscape architecture's ethical and political power to shape the world. Gareth Doherty will open new possibilities for understanding the present and imaging the future through recent projects in the Critical Landscapes Design Lab at Harvard University's Graduate School of Design. The Design Lab engages with diverse audiences and pressing socio-ecological issues across the postcolonial and Islamic worlds where landscape architecture can help imagine better futures. A central premise is that experiential knowledge—gained from the embodied engagement of landscape fieldwork—can help to revise how we understand and use western canons of landscape knowledge and offer us new possibilities for the design imagination.

Dr. Gareth Doherty ASLA, an Associate Professor of Landscape Architecture at the Harvard University Graduate School of Design, is the Director of the GSD's Master in Landscape Architecture program and the Critical Landscapes Design Lab. Doherty's research and teaching explore human-centered issues alongside environmental and aesthetic concerns through a human ecology framework.

Architecture and Creative Practices for the City and Landscape MS programme

Academic Year 2022-2023

Sustainability issue and targets Design Studio | Prof. E. Antonini and Prof. J. Gaspari | Tutor arch. L. Felicioni
