School of Sustainability

# OPEN

**FONDAZIONE GOLINELLI**

Via Paolo Nanni Costa, 14  
Bologna

**6 FEB**  
**H 18.00 - 20.00**  
OPEN ENTRANCE

**Massimo Lepore**  
Co-founder TAM Associati

*SUSTAINABILITY IS ALL*

Per iscriversi all'evento si prega di inviare una e-mail all'indirizzo [info@schoolofsustainability.it](mailto:info@schoolofsustainability.it) e sul website [www.schoolofsustainability.it](http://www.schoolofsustainability.it)

entro il giorno 05/02/2019

La partecipazione all'evento prevede il riconoscimento di **2 CFP** dall'**OAAPC** della provincia di Bologna

## SUSTAINABILITY IS ALL

**Massimo Lepore**

TAM Associati  
[www.tamassociati.org](http://www.tamassociati.org)

Architecture deals with sustainability whenever respects people and nature: this should be our goal in design, but how to achieve it?

We have to plan interactions, as the only way is to integrate the many factors -people, place, materials, technologies, resources- in a open and integrated creative process, so that each element can contribute to the deep reason of the project. Any design we apply collects a teamwork experience that harvests its meanings in the place we want to transform and shapes its results thanks to the sincronicity and the combination of all the generative elements involved in the process. This way, each project borns and stand in the hands of people acting for social and environmental inclusion, so that the building -or the space- can be recognised at the very end as a "common" for the whole community. In the last years, we've focused this approach as a key strategy for our work as TAMassociati, and we are pleased to present here some examples:

Sunugal Project: eco-simplicity for agricultural villages in Senegal

Port Sudan PC: a healing place for Sudan

Kisumu Hospital: restoring HC excellence in Kenya

Mura San Carlo: a community design in north Italy

Alce Nero: regenerating by de-sealing italian cities
